

# Workshop on Updates to Appliance Standards

October 27, 2021

# Agenda Overview

---

## Welcome

Steven Hershkowitz, Rulemaking and Legislative Coordinator

## Overview of Rulemaking Scope

Glenn Blackmon, Manager, Energy Policy Office

## Updates: Computer Monitors and CTA-2045 B

Liz Reichart, Sr. Energy Policy Specialist, Energy Efficiency

# Overview of Appliances Rulemaking

---

Appliance standards represent a cost-effective strategy to protect consumers and businesses and strengthen Washington's clean energy economy.

- Adopting appliance standards
- Updating standards and test methods
- What this rulemaking update will cover
- Update to emergency rulemaking on water heater rule suspension

# Updates to Standards and Test Methods

---

## Computer Monitors

California Energy Commission (CEC) has updated energy efficiency requirements for computers, workstations, monitors, and signage displays.

- Current Washington reference: Title 20, CEC

## ANSI/CTA-2045 B

- Current Washington reference: ANSI/CTA-2045 A
- Current products required to have CTA-2045 technology: water heaters

Differences between version A vs. version B

## In consideration of other products

Commerce welcomes public comments on additional standards and test methods for update in this rulemaking.
